

## Custom Processing Fact Sheet & Price List 2026

*Your Own Yarn from Your Own Flock.* As part of our commitment to small scale sheep and fiber producers, The Green Mountain Spinnery provides a custom processing service. We enjoy working with fiber producers to design yarn particular to their unique fleece and fiber considerations. We card and spin as little as 40 lbs of scoured fleece. For lots weighing less than 40 lbs after scouring, you can purchase enough additional wool from us to bring the scoured weight to 40 lbs.

The following information details the basic variables involved in creating a custom yarn.

### Production Information

**Process:** We work with our customers to design yarns which enhance the characteristics of the fibers used. The quality of the yarns is directly related to the quality of fiber provided. We are known for producing excellent light weight, worsted weight, and bulky yarns, either plied or unplied. Our method of hand scouring takes particular care of the fleece and fibers. To minimize our use of petroleum products, all scouring and processing are done with vegetable oil-based soap and spinning oil. No chemicals are used for moth or shrinkproofing, or for removing chaff. You can request Certified Organic processing.

## Fleece Requirements:

The best quality yarns are made from fleece and fibers which are:

- clean and free of chaff, burrs, tags
- well-shorn with few second cuts, and top knots, britches, belly wool discarded
- staple length from 2.5 to 5.5 inches
- stored dry, preferably in burlap bags, cardboard boxes, pillow cases or leaf bags.

**PLEASE NO PLASTIC GRAIN BAGS**

- free of moths & moth damage; NO mothballs
- a blend of fibers not too coarse or slippery for our machines

Please send us a small sample of your fleece to help us determine if we can process it effectively.

**Color Consideration:** Call for free natural color blend samples showing different percentages of white and colored fleece. Many customers choose to dye their own yarns.

**Fiber Blend Considerations:** The producer may blend wool with mohair, angora or other precious fibers. Our sample card shows several of these special blends. We can blend up to 40% wool/60% mohair or alpaca depending on the grade and staple length used. We can produce wool yarns with percentages of other natural precious fibers, and are happy to produce cost estimates for these special lots separately.

**A Good Return:** The average custom process return is 55 lbs of finished yarn /100 lbs raw fleece. Return percentage is affected by grease content and cleanliness of your clip.

Shipping is at customer's expense. Full payment is required prior to shipment.

Please pay by check, otherwise payment by credit cards incurs a 3% charge increase

- 1) ½ % interest/month on invoices over 45 days
- 2) Storage fee: \$15.00/month on each 50 lbs held over 45 days
- 3) A deposit of \$200.00 is required prior to production.
